Several research and service activities

- Networking activities
  - mgmt, dissemination
  - support for users and nrens
  - foresight, coord, workshops
- Service activities
  - end-to-end qos
  - eduroam?!

Several research and service activities ...

- JRA1 – performance, measurement, mgmt
- JRA2 – security
- JRA3 – switched paths, multi-domain services, AAA services
- JRA4 – testbed
- JRA5 – roaming (Klaas Wierenga), AAI (Diego Lopez), SSO (Ton Verschuren), future tech (TW)

Roaming

- eduroam
  - starting point – an eduroam pilot in operation
  - develop service-quality stuff
    - policy (done), monitoring (coord AAI), ...
  - investigate ideas about next generation (under prep)
  - eduroam – trans to service (draft roadmap)
  - service – guess: late spring
  - inter-nren roaming cookbook
- when are we successful

AA Confederation Technology

- edugain – confederation architecture
- under construction (papi, feide, shibboleth)
- first confederated successful authn in august
- no policy yet
- no transition to service in the project
- pilot test in some other activity
  - measurement
  - light path switching
- cookbook

SSO

- Late
- SSO of nonbrowser application
- merge of eduroam authn and edugain
- draft requirements documentation

Future Technology

- late
- will be done mainly within the other items
- ipv6, Infocard, diameter, multiple sourcesof auth info
