AWS Pace of Innovation

New Service Announcements & Updates

A culture of Innovation: Experiment Often & Fail without Risk

On-Premises
Experiment Infrequently
Failure is expensive
Less Innovation

Experiment Often
Fail quickly at a low cost
More Innovation

Why Are Customers Adopting Cloud Computing?

**Trade capital expense
for variable expense**

**Increase speed and
agility**

**Benefit from massive
economies of scale**

**Stop spending money on
running/maintaining data
centers**

Stop guessing capacity

Go global in minutes

Lower Costs with AWS Up-Front and Increase Savings as Your Usage Grows

1

Replace up-front capital expense with low variable cost

“Average of 400 servers replaced per customer”

Source: IDC Whitepaper, sponsored by Amazon, “The Business Value of Amazon Web Services Accelerates Over Time.”
July 2012

2

Economies of scale allow us to continually lower costs

40 Price Reductions

3

Pricing model choice to support variable & stable workloads

On-demand
Reserved
Spot

4

Save more money as you grow bigger

Tiered Pricing
Volume Discounts
Custom Pricing

Many Purchase Options to Support Different Needs

Free Tier

Get Started on AWS with free usage & no commitment

Good for Initial evaluation

On-Demand

Pay for compute capacity by the hour with no long-term commitments

Ideal for Development & Test

Reserved

Make a low, one-time payment and receive a significant discount on the hourly charge

Ideal for baseline workloads

Spot

Bid for unused capacity, charged at a Spot Price which fluctuates based on supply and demand

Ideal for Test scenarios, Simulations

Dedicated

Launch instances within Amazon VPC that run on hardware dedicated to a single customer

For highly sensitive or compliance related workloads

Increased agility has become the #1 reason businesses use the AWS cloud

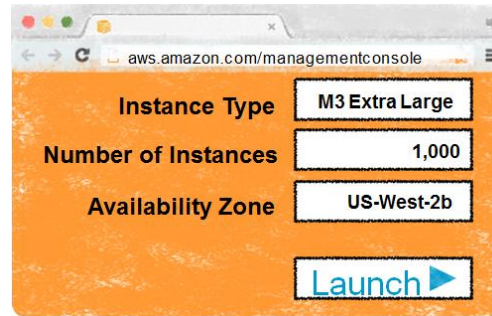

Companies Can't Afford to be Slow

Old World:
Infrastructure in **Weeks**

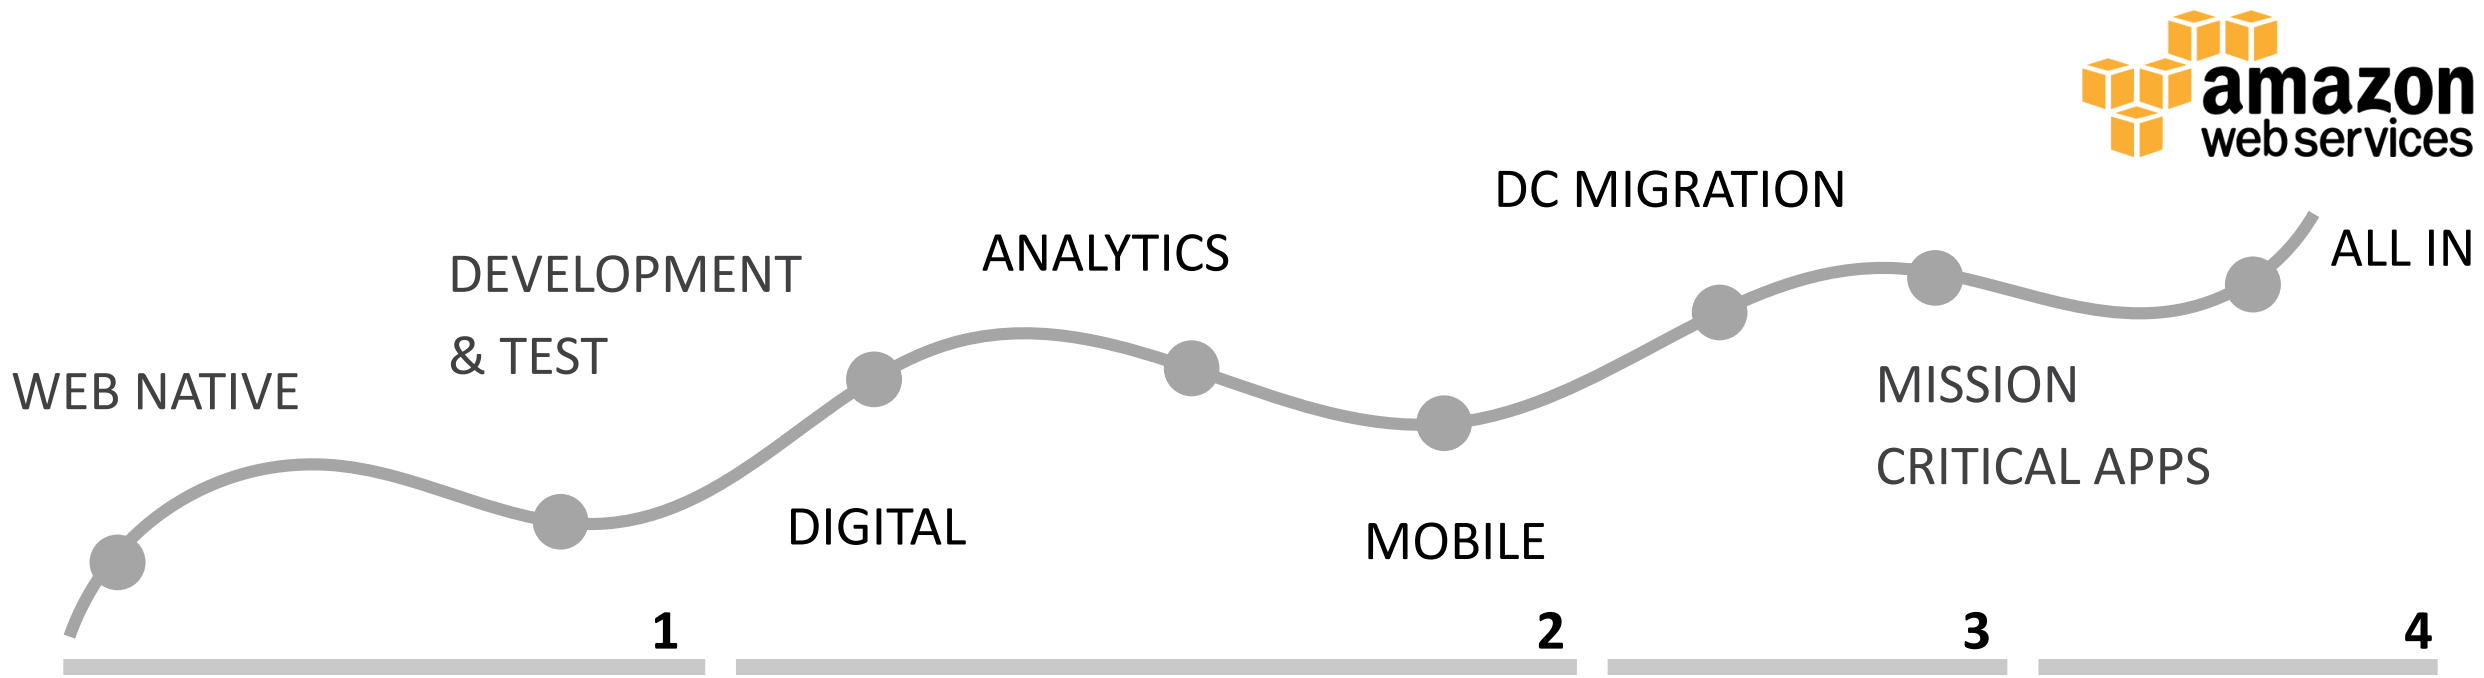

AWS:
Infrastructure in **Minutes**

- Add New Dev Environment**
- Add New Prod Environment**
- Add New Environment in Japan**
- Add 1,000 Servers**
- Remove 1,000 Servers**
- Deploy 1 PB Data Warehouse**
- Shut down 1 PB Data Warehouse**

Everything changes with this kind of agility

Cloud Adoption Path

The Cloud Isn't an "All-or-Nothing" Choice...

...it's a **journey.**

On-Premises Apps

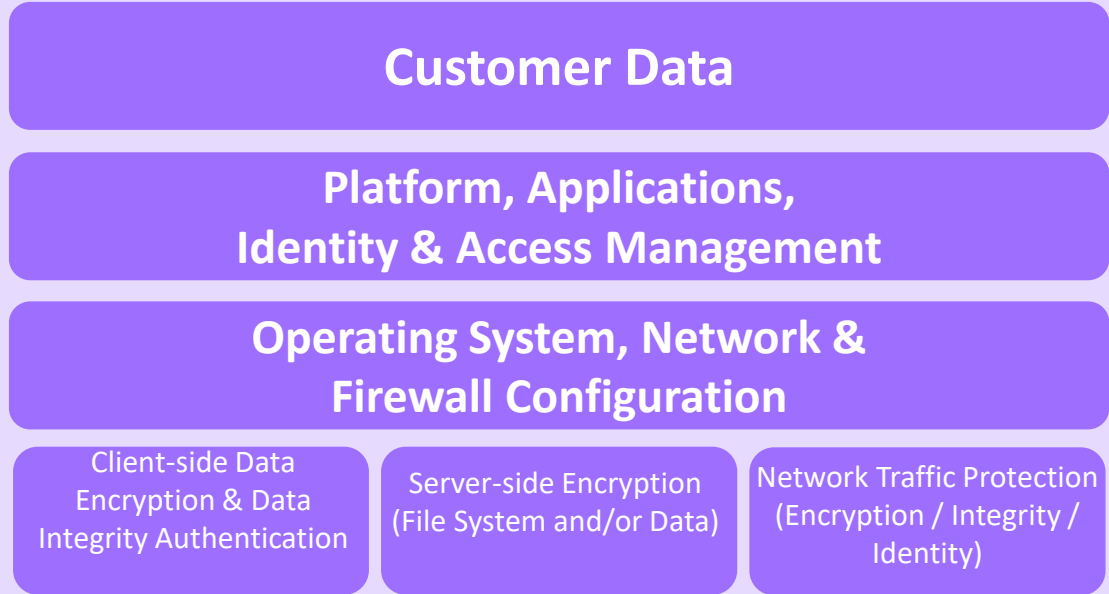

- Active Directory
- Encryption
- Network configuration
- Backup appliances

AWS Cloud Apps

- Users and access rules (IAM)
- Encryption (S3, RDS, HSM)
- Your private network (VPC)
- Backups (Storage Gateway)

With AWS, Security Is a Shared Responsibility

Customers are responsible for security *'in'* the Cloud

AWS is responsible for security *'of'* the Cloud

Architected for Enterprise Security Requirements

Certifications and accreditations for workloads that matter

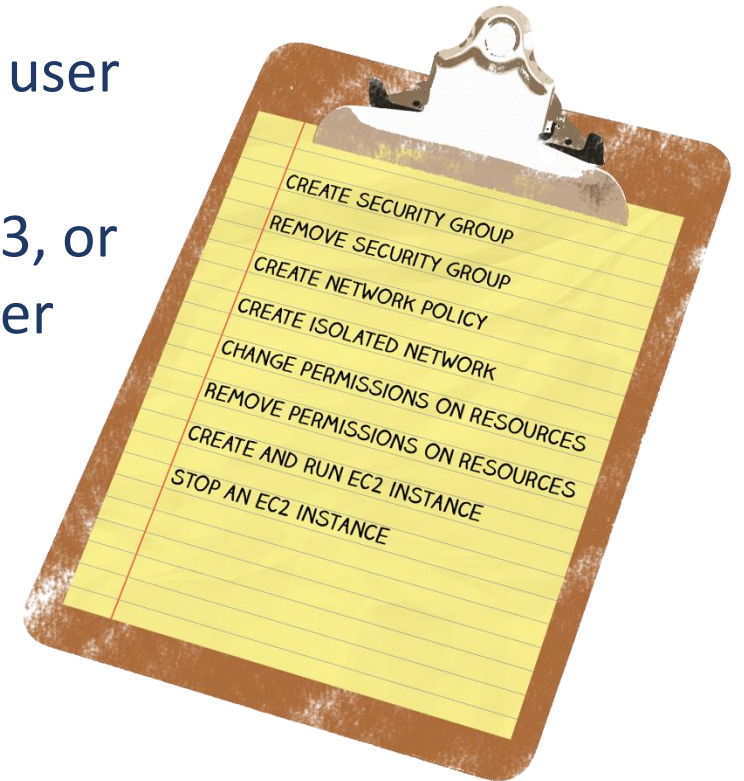

AWS CloudTrail - AWS API call logging for governance & compliance

Log and review user activity

Stores data in S3, or archive to Glacier

Access a deep set of cloud security tools

Networking

Virtual Private Cloud
Isolated cloud resources

Web Application Firewall
Filter Malicious Web Traffic

Shield
DDoS protection

Certificate Manager
Provision, manage, and
deploy SSL/TSL certificates

Encryption

Key Management Service
Manage creation and control
of encryption keys

CloudHSM
Hardware-based key storage

Server-Side Encryption
Flexible data encryption
options

Identity & Management

IAM
Manage user access and
encryption keys

SAML Federation
SAML 2.0 support to allow
on-prem identity integration

Directory Service
Host and manage Microsoft
Active Directory

Organizations
Manage settings for multiple
accounts

Compliance

Service Catalog
Create and use standardized
products

Config
Track resource inventory and
changes

CloudTrail
Track user activity and API
usage

CloudWatch
Monitor resources and
applications

Inspector
Analyze application security

Artifact
Self-service for AWS'
compliance reports

More assurance programs than anyone

AWS Educate Value Proposition

Grants for free usage of AWS services

Labs and training on cloud topics and AWS products

Open course content by leading professors and AWS

Communities that share best practices virtually and in person

- ✓ Positively impact students around the world
- ✓ Curriculum change
- ✓ Student app development and entrepreneurship
- ✓ Accelerate hiring pipeline

+JOBS

More than 500 institutions have joined

Launched March 2015:

- Global leaders: computer science, entrepreneurship, big data and business schools
- Educators and students from around the world
- Actively sharing curricular assets
