NORDUnet 2017 tender for a Media Management Solution Q&A

Q&A's relating to ITSFB

Item

Item	Description	Question	Response
Q22 & Q25	The following question which is in the Integrations and API category, seems to be out of place and is a duplicate of Q22 in the Media Management Functions and Functionality category. Q25 Please describe what user interactions are being logged (playback, download, deleteetc.) – and at what aggregation levels these are available?	Can you confirm that we just need to respond to Q22 – or if you are looking for something different in relation to the API from Q25?	You are correct, question Q25 do not need to be responded to.
